## Waterproof Connectors Combining Optical and Electrical Connections

## MF25 Series

## Applications

Outdoor optical transmission systems: Surveillance cameras and monitors, base stations, railway, transportation, survey, geological and exploration equipment.

## Features

## 1. Fiber optic and electric hybrid connection 3 electrical contacts rated at 30A max. current 2 fiber optic connections (single or multi-mode fibers)

2. Used in harsh outdoor environments

Construction, materials and components assure consistent performance when used outdoor. Tested 500 hours in salt fog without any affect on its performance. Rated IP67-complete protection against dust, no water penetration when submerged in water at depth of 1.8 m for 48 hours.

## 3. Variety of cables

Up to 18 mm outside diameter cable can be used (electrical and optical combined).
Solder termination of electrical conductors having cross sectional area of 6 mm - (equivalent of AWG\#10) may be used.

## 4. Low insertion loss

Ferrule can be tuned to guarantee insertion loss of less than 0.4 dB .
